## A SUMMARY OF THE NEWS

After seven weeks of legal arguments, the task of selecting a jury to try eleven Communist leaders started in Federal court here yesterday. Judge Medina refused to dismiss the indictments, which charged the defendants with teaching and advocating the overthrow of the Government. He did take under advisement the defense plea that President Truman's allusion to two Communist officials as "traitors" made a fair trial impossible.

The Justice Department hopes to obtain indictments by Friday against Judith Coplon, one of its employees, and Valentin A. Gubitchev, Russian aide in the United Nations Secretariat. Evidence was presented to the special grand jury investigating Communist espionage. The court was asked to cite for contempt a witness who refused to answer the jury's questions in the Hiss-Chambers case.

By a vote of 384 to 4 the House passed a bill to strengthen the intelligence service. Great secrecy surrounded the measure, one section of which would permit up to 100 aliens who had helped intelligence work abroad to enter the United States each year. A Senate committee unanimously approved a bill for closer protection of official codes.

A reorganization of the Munitions Boards, turning a larger measure of control over to civilians, was announced.

All non-regulatory functions of the Government agencies dealing with transportation should be centered in the Department of Commerce, the Hoover Commission reported.

By unanimous vote the Senate Foreign Relations Committee approved the full $5,580,000,000 ECA request for the 15 months ending June 30, 1950. Several members reserved the right to support reduced appropriations later.

The cruiser Milwaukee, the first warship lent to Russia under Lend-Lease in 1944, is due to return to the United States today.

German Communists launched their new campaign against a Western Germany and the Western powers. Russian occupation officials, however, showed signs of a more friendly attitude.

The Soviet bloc suffered a double defeat in the United Nations Economic and Social Council. That body authorized an inquiry into alleged slave labor behind the Iron Curtain and rejected an inquiry into "real working conditions" in all countries. The Security Council decided to turn over to the Trusteeship Council its political, social and economic jurisdiction over certain Pacific islands.

## PAYING BRITAIN'S BILLS

Socialism is bankrupting the British empire. The government is already insolvent, and going further in debt day by day.

Why doesn't it fold up?

Why hasn't the crisis led the British people to throw the bankruptcy-bound Socialists out of power, and put in some other government which will "save what's left"?

YOU OUGHT TO KNOW!

It's YOUR money that's meeting the English deficits.

It's YOUR dollars that are keeping the English Socialists in office—creating the illusion to the British voters that the Socialist program is "working out."

And it is YOUR money the Socialists are counting on to fool the British people into giving them another five-year term of power, in the crucial coming elections.

The American press is only faintly interested in the parade of deficits in England. The American people appear to be still less so.

Yet they should be interested. They've been paying these bills—will go on paying them, if President Truman and his State Department have their way.

Every major step taken by the Socialists in their British program has been financed by the American people.

The first post-war British "loan" let the British cut their own taxes, and paid for setting up the Beveridge Plan.

The first installment of the Marshall Plan (about a third went to Britain, and hardly any to "feed starving babies in mid-Europe") let the Socialists cut British taxes again, and also allowed them to set up the Nationalized Health program. YOU are paying for the vast quantities of eye-glasses, false teeth and wigs being handed out by the socialists to the British people!

The second installment of the Marshall Plan, now being pushed through "your" Congress, is intended to furnish the British Socialists with a spot of cash with which to buy the coming election—buy it with gifts to voters which the Socialist Government could never afford on its own steam.

Broadly speaking, the American gifts have checked off almost dollar for dollar against the British deficits.

### MISSING THE GOAL

There is one agency ministering to the unfortunate peoples of Europe which receives too little recognition for the great work it is doing. It is commonly referred to as CARE.

Recently there have been complaints that the organization has been slow in making deliveries, and that packages ordered for Christmas had not yet been sent. One of the directors explains that thousands of orders for certain type packages had been held up because the necessary articles were not immediately available, but would be later.

Recently shipments went to a home for blind children in Germany. These children, blinded by war, are among the most pitiable cases in the entire country. Gifts included dresses for the little girls, toys, candy and many other things which delight youngsters. A correspondent present at the distribution described the scene. Smiles spread over blank little faces and tiny hands caressed the garments. "Does it have flowers, and what color is it?" asked one child who was given a new dress.

There is coffee for the aged, food for the sick, warm garments for others. There were 55,000 orders for a single type package. "It is hard for me to believe your people can be interested in the life of a little child," one nurse in the home declared. "Your people must be very tolerant and very forgiving."

How little is the real American spirit understood abroad. How woefully have American diplomats failed in inculcating in other peoples an understanding of the generosity which is typically American.

### SHOALS AHEAD

The division of the nonpartisan Hoover Commission over the question of changes in government accounting procedures, and the thinly veiled warnings of the dissenting minority certainly proved that sacrosanct territory has been invaded. The recommendation would have had the effect of clipping the wings of the General Accounting Office.

According to the report of the Hoover task force, there are serious weaknesses in the fiscal operations of the government. Some of the practices, the commission says, date back to the time of Alexander Hamilton, when the budget was $4,000,000 a year—less than one ten-thousandth of the current budget.

The commission is probably being kind when it says that these practices are "totally inadequate." But this charge isn't what bothers dissenting Congressmen. It is the prosposal to set up an "accountant general" under the Treasury Department, which would, in effect, move the authority over accounting systems from Congress to the executive branch of government.

The dissenters think it amounts to a demotion for the comptroller general, who gets his power from Congress. The commission says that isn't so.

The commission may find shoals ahead.

## Paying Britain's Bills

Continued from Page One

The first "loan," back in 1946, was for $4 billions. If you deduct the large share of this money which went to pay for tobacco and movies to keep the British people in a good humor, the rest of it just about covered the big deficit of the first year of Socialism.

The hidden gifts to the Socialists contained in last year's installment of the Marshall Plan just about covered last year's deficits.

Now new deficits are piling up—and the Socialists are waiting impatiently for Uncle Sam (which means YOU) to foot the bill. Hence the rush to shove the Marshall Plan appropriation through Congress without taking time to examine the program or what we are getting for our money.

The nine-month deficit of the British Government, for its home-front program alone, has recently been revealed. It is approximately $900,000,000. That's about one-eighth, or 12.5 per cent, of the original budget appropriations.

A great deal of this comes because the Nationalized Health program of the Socialists is running hog-wild. The free false-teeth and free eye-glass programs are each more than $40,000,000 dollars in the red. Other "free" services have brought the health program alone into a deficit of some $250,000,000.

The government is also far overboard in its food-subsidy program by which the voters are being kidded into thinking the Socialists are able to supply food at less than it really costs.

The Socialist scheme of paying a "bonus" for British babies is building a new financial prablem for the future. Within three years it is expected that the school population, already far too great for the accomodations, will have jumped another million.

Here is another bill which eventually, on the present policy at Washington, will be handed along to YOU for payment. That's only fair. You helped pay for the baby-bonuses of the Beveridge Plan. Why shouldn't YOU help pay to send these extra babies to school?

In addition to paying for what the Socialists are doing, YOU are paying also for what they aren't doing.

The British Socialists have pulled England out of nearly all the responsibilities she formerly accepted as a world power. When the Britons walked out of the Greek situation, YOU began paying the bills as Uncle Sam took over. Likewise in half a score other parts of the world.

When the British pulled out much of their contributions to occupied Germany, YOUR bills for American occupation there soared accordingly.

Now Uncle Sam is about to furnish billions of dollars worth of arms to Western Europe. Under former British standards, the British government would have shared this burden. Now YOU will be paying for it all.

Observers in England declare that the issue in the coming election there, which will decide the future of British Socialism, will be the issue of retail prices.

The British people, it is declared, are uninterested in world affairs, apathetic over whether they are headed for serfdom as a race and a tin-cup future as a nation.

They will stand for rationing, scarcities, inferior products, regimentation, restrictions, mass poverty — if only the Socialists will make it possible for them to buy food, clothing and entertainment at cheap prices.

There's only one way under the sun by which the Socialists can do this. That's to make YOU pay part of the bill, everytime a Briton buys a loaf of brown-bread, or a bottle of skim-milk, or goes to the movies.

The Socialists are all set to do this with a new and enlarged program of subsidies. The only thing they need is the money. That's where YOU come in. They want YOU to put up the money, so they can fool the British people, so they can be re-elected, so they can finish the job of wrecking the British Empire's economy and future.

What do YOU think about it?

## Today's Quiet Moment

By Rev. Vernon M. Murray, Jr.
Pastor
Wilkinson Methodist Church
Croydon

"Come unto me all ye that labor and are heavy laden, and I will give you rest" (Matthew 11:28).

From north, south, east and west weary men and women have come to Christ to lay their heavy burdens at His feet. We would do well to take more of our problems to Him in prayer, and in doing this we would solve all our problems of today.

We are expected to be workers for the Kingdom of God, but when we have reached our saturation point, He has promised that rest that the world cannot give, nor take away.

Peter verified this statement of Christ when he said, "Casting all your care upon Him, for He careth for you".

Our Father, help us to cast our cares, problems, and burdens upon Thee. Help us to withhold nothing from Thee, else we do not receive Thy rest and comfort; through Jesus Christ our Lord, Amen.

Don't forget — Go to Church next Sunday
